* Common renovation activities like sanding, cutting and demolition can create hazardous lead dust and chips by disturbing lead-based paint, which can be harmful to adults and children. To protect against this risk, the Environmental Protection Agency (EPA) issued the Renovation, Repair, and Painting Rule (RRP Rule) that became effective on April 22, 2010. I understand that to comply with federal law any renovation, repair and painting work that disturbs lead-based paint in homes, child care facilities, and kindergartens built before 1978 must use certified renovators who follow specific work practices to prevent lead contamination. For more information go to the EPA website (<https://www.epa.gov/lead>) or call the National Lead Information Center at 1-800-424-LEAD. I acknowledge that I have read and understand the prior statement.:
